Mailed: 12-22-03

At: Long Beach, California

Information Disclosure Statement

Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

Sir:

Attached is a completed form PTO-1449 and copies of the pertinent parts of the references cited thereon. Following are comments on cited references pursuant to Rule 98.

Laskowitz shows a centrifugal force mechanism of variable radius that generates a thrust with the weights attached on the outer end of each of the several arms involved. **Young** discloses a directional force generator comprising one or more rotating shafts with swingable arms revolving about a main shaft. **Cuff** shows a device that converts rotary motion into a linear force by varying the radius of gyration of the masses that generate a centrifugal force. **Cook** shows a device for conversion of centrifugal force to linear motion by way of a mass exchange between counter rotating arms.

None of the cited references employ revectoring as a means to generate a directional thrust from a centrifugal force. To the contrary, the references cited produce a discontinuous directional force of variable magnitude. In contrast to the cited references, applicant's invention generates a continuous and directional propulsion force at constant magnitude.

Very respectfully,

Applicant(s): _____
